Hi,

I got a message saying my account was permanently deactivated because someone else was using my account. I want to explain what happened because I don't think this is right.

The person in the verification pictures is my brother. I don't know why his picture came up on my account. I never gave him my account so he could do deliveries for me.

I understand that I'm supposed to be the person using my driver account. I have always used my own account and I haven't had any problems with this before.

If my brother got into the account or did the verification, it was not something I knowingly allowed him to do. I am willing to verify my identity again or do whatever is needed to show that this is my account.

Please review the decision before permanently closing my account. I would really appreciate having my account reinstated.

Thank you,

Daniel Reyes
