July 2, 2026	8:02 AM	Successful authentication	CR-MOB-1194
July 2, 2026	8:04 AM	Identity verification started	CR-MOB-1194

System Notes

A successful authentication records access to the account. Device and session information does not independently identify the individual operating the device or entering the account credentials.

Identity verification is available after successful account authentication.

Record Source

Celeris Route account activity records maintained in the ordinary course of platform operations.

Sample Case Record: This document contains fictional account activity data created for use in a DecisionLayer arbitration sample case.
