Hi Elena,

Thanks for flagging this. I reviewed the PO and our order file this morning.

On the $500.00 expedited delivery / handling line, that charge was entered in connection with the requested delivery timing. I am checking our file for the written authorization supporting that charge and will confirm once I have it.

On the oil filters, I see the receiving report showing 96 units received. Our shipment record shows 100 units were packed and shipped. We will reconcile the packing and receiving records before treating the four-unit difference as final. If the shortage is confirmed, we will make the appropriate account adjustment.

For now, please process the amount you consider undisputed while we complete the review. I will follow up with the supporting records.

Thanks,
Sofia
