Hi Sofia,

We are formally disputing the portions of invoice VP-INV-260210 that remain unresolved after our review of PO MFS-PO-260201 and the receiving report.

First, the accepted PO totals $29,000.00. The invoice includes an additional $500.00 expedited delivery / handling charge. We do not currently have a purchase order revision or other written authorization for that charge.

Second, the receiving report records 96 of the 100 oil filter assemblies. Please provide the packing/shipping record supporting the 100-unit shipment and confirm how Valencia proposes to account for the four-unit difference.

Third, please provide the service record or other supporting documentation for the $1,875.00 inventory-management service charge, including the applicable rate or authorization under the PO or Agreement.

We will continue to pay amounts that are not in dispute. Please send the requested records so the account can be reconciled.

Thanks,
Elena
