Hi Elena,

Following our review of the receiving discrepancy, we have issued credit memo VP-CM-260305 in the amount of $1,500.00 against invoice VP-INV-260210.

The credit is being applied as an account adjustment relating to the quantity discrepancy and the related billing review. It is not intended to waive or resolve the separate questions concerning the expedited delivery / handling charge or the inventory-management service charge.

After the $8,000.00 payment received on February 24 and this $1,500.00 credit, the current invoice balance shown in our records is $20,000.00.

I have attached the credit memo for your AP records. If you believe an additional adjustment is required, please identify the amount and supporting basis so we can review it against the PO, receiving records, and service documentation.

Thanks,
Daniel
