Hi Daniel,

Thank you for sending the credit memo. We have applied the $1,500.00 credit to our internal reconciliation, but we do not agree that the resulting $20,000.00 balance is the amount currently payable.

Our remaining concerns are the $500.00 expedited delivery / handling charge, the four-unit oil filter shortage, and the $1,875.00 inventory-management charge. We also continue to review the receiving and service records for other quantity and service discrepancies identified during our month-end reconciliation.

At this stage, we are not treating the $20,000.00 balance as undisputed. We are willing to pay amounts that can be supported by the accepted PO, verified receipt records, and documented services, but we need the remaining supporting records before the account can be finally reconciled.

Please provide the service records supporting the inventory-management charge and any written authorization for the $500.00 expedited delivery / handling line. We will compare those records with our receiving documentation and respond with our proposed final reconciliation.

Thanks,
Elena
