Internal follow-up notes

1. The four-unit oil-filter shortage was identified during receiving count and was not resolved at the dock.
2. The two damaged hose packages were noted by the receiving clerk; the hoses were visually intact at receipt.
3. Receiving records do not by themselves establish whether a shortage occurred before shipment, during transit, or during receiving.
4. Operations requested reconciliation against the supplier packing record and carrier paperwork.
5. No determination is made in this log regarding the contractual amount ultimately payable.
