Subject: PO MFS-PO-260201 — Priority Delivery Request

Sofia,

The Purchase Order already calls for delivery by February 9. In addition to that ordinary delivery requirement, our operations team is asking whether Valencia can place this shipment on priority handling so it reaches our Henderson facility early enough for the morning maintenance schedule on February 9.

Please confirm whether Valencia can arrange the priority handling. If that requires an additional delivery or handling charge, please identify the amount and basis before shipment so our procurement team can review it.

Thanks,

Javier Torres
