Operations notes

1. The PO includes a $1,875.00 inventory-management service line; this log records the work observed by Monterrey operations.
2. Pre-receipt setup was completed before the February 9 delivery.
3. Receiving reconciliation was started on February 9, but the four-unit oil-filter variance remained unresolved.
4. The February 10 cycle-count / variance review was not completed because supplier shipment and supporting records were still being requested.
5. This log does not determine whether the contractual service charge is due; it records operational completion status only.
